

Partnership Driven Solutions

Our goal is to understand and exceed our customers' needs in the areas of **automation, fluid power, and motion control**. We will develop mutually beneficial relationships with our customers, vendors, and employees through loyalty, respect, education, and stewardship of resources.

Our Expertise

Your partner in total machine safety, motion control, hydraulics, pneumatics, vacuum, & lubrication solutions.

We bring together expertise in manufacturing, mechatronics, & engineering to deliver precision-engineered motion mechanisms. Shop on dec-marine.com.

Where innovation meets reliability to elevate the standards of fluid management in the life science industry.

Strategic partner to manufacturers, integrators, & machine builders in automation and electrical control solutions.

Vendor Partners

Partnership Driven Solutions

Innovative leader of proportional & reliable miniature pneumatic products & custom solutions. *

Engineering & manufacturing of high performance hydraulic valves, pumps, & power unit systems.

Designer & manufacturer of hydraulic & pneumatic actuators for tough applications.

Manufacturer of the toughest hydraulic pumps & systems for the most demanding fluids & applications.

Global leader in hydraulic power safety valves, pneumatic safety valves & controls. **

Premier precision gripping, rotary, & linear solutions for automation & robotic applications. **

Precision metering valves & drum pumps for lube delivery. Custom dispensing nozzle design & installation.

Distributor of power-off safety devices and rod locking units.

Hydraulic piston & bladder accumulators for pulse dampening or stored energy.

Premier fluid connectors for the medical, industrial, electrical, cooling, & life science industries. *

Motion controllers for 1-32 axis of hydraulic motion & electromechanical actuators.

Quality source for small & custom PLC, harsh environment controllers, & IOT solutions.

Linear roller-screw actuators for precision motion control with medium to high forces.

Leader in servo-motors & amplifiers, variable frequency drives, motion controllers, & gear box solutions.

Manufacturer of organic micro-lubrication fluids & delivery systems specifically for metal fabrication.

Manufacturer of unique actuators for high-speed pick-n-place, stepper drive, & indexing assemblies.

High-performance industrial vacuum solutions for automation, manufacturing & fabrication.

Industry leader in filtration & thermal management technologies.

* Currently not distributed in Indiana by Donald Engineering.

** Currently not distributed in East-Michigan by Donald Engineering.
